**Would you like to save as much as 20% on your energy bills and...**

- ✓ cut your heating and cooling (HVAC) repair bills by 90%
- ✓ extend the life of your HVAC equipment by as much as 100%
- ✓ have peace of mind knowing your HVAC expenses are covered in one low monthly fee?

Then our **York's Premium Maintenance** Program is perfect for you!

For many businesses, heating and cooling your facility can be the second most expensive cost to your business next to payroll. When HVAC equipment is not properly maintained, the equipment becomes inefficient and problems begin to snowball. Pretty soon you are spending thousands of dollars on avoidable repairs — or worse yet, tens of thousands on unexpected replacements.

The commercial HVAC experts at York's Quality Air offer an all-inclusive full-service maintenance program for businesses just like you. It takes away surprises, gives you peace of mind that your equipment will always be running most effectively and efficient, and offers you one low monthly fee you can budget for.

Simply request a  
**FREE ON-SITE ASSESSMENT**  
and one of our experts will visit your facility to inspect your equipment, answer any questions you have and provide you with a detailed quote. You can't go wrong with our York's Premium Maintenance Program.

## What is really included in the York's Premium Maintenance Program?

This program includes all the services and repairs necessary to keep your equipment running at its optimum condition. You pay one low monthly payment based on the size and amount of your HVAC equipment and we take care of the rest.

## Why don't more people consider a program like this?

We ask ourselves the same thing. Actually it's why we are starting this great awareness campaign to share the benefits with all business owners in central Indiana.

## How often do you service the equipment under this type of agreement?

Since it's in our financial interest to minimize repairs and problems, we end up servicing it more than you would probably think. Our objective is to save you money with this program through energy savings and repair costs. If we succeed, it becomes a win-win and you are a customer for life.

## Wouldn't I spend more money in the long run this way?

Not even close. This program assures you that you will be getting the recommended service your unit needs to run optimally. Repair costs most often occur when units are not being properly maintained. Repairs can average 10 times more than the maintenance cost. Also, clean equipment is more energy efficient - saving you money on your gas and electric bills.

## How do you decide what equipment needs to be repaired and what needs to be replaced?

Often this has to do with the age, condition and efficiency of the equipment. Occasionally technology changes (like recently with refrigerant) which creates other criteria for repair or replacement considerations as well. Our approach is to sit down with you to explain the pros and cons and together make the best decision for you.
